

Nasal endoscopy score thresholds to trigger consideration of chronic rhinosinusitis treatment escalation and implications for disease control

Would I consider treatment escalation?

How strongly?

29 rhinologists

Scoring system

Considering treatment escalation?
Endoscopic CRS control?

MLK \geq 4 or NPS \geq 3

- Threshold for treatment escalation
- Lack of endoscopic CRS control

MLK $<$ 4 or NPS $<$ 3

- Endoscopic treatment goals for CRS
- Endoscopically controlled CRS

Lower in presence of burdensome symptom

Higher when stronger affirmation required for considering treatment escalation
