IT CONSULTING

We offer process improvement services in order to meet the challenges of tomorrow by using innovative process models.

We follow the best software engineering and project management practices, which enables you to be an active member of a project team and participate in monitoring, managing time and requests, having insight into reports, etc.

When developing custom made applications we engage not only developers, but the experts with applicable domain knowledge and experience, too. In this manner you will have the most efficient system as it can provide support for the specific needs of the business, which might not be available in an off-the-shelf solution.

We are open-ended in terms of discussion on how to make a hybrid model of custom software

MOBILE DEVELOPMENT

We have the teams that particularly specialize in mobile apps development. We could help you to build comprehensive IT solutions, where mobile services are on top of it.

- Well-known or latest mobile technologies, such as: RFID, NFC, Beacons, GPS, etc.
- Particular focus on user interface, as well as on performances
- Mobile back-end facilitating operations
- IoT

FSD
